

Bach Phan-Tat

phantatbach.github.io github.com/phantatbach phantatbach(AT)gmail.com

Computational linguist and data scientist developing interpretable methods for detecting and analysing CHANGE. My current research focuses on lexical and conceptual change using NLP techniques and (diachronic) corpus data. I am also extending this work towards financial time-series analysis and potentially other domains that CHANGE.

WORK EXPERIENCE

The Digital Humanities Institute, University of Sheffield **Sep 2026 – Nov 2026**
Visiting Research Scholar *Sheffield, England*

Vbee (speech technology and conversational AI company) **Feb 2023 – Aug 2024**
Junior Research Engineer *Hanoi, Vietnam*
Project: HUST Chatbot (a conversational AI for Hanoi University of Science and Technology)

- Developed and evaluated machine-learning and BERT-based models for chat domain classification, toxicity detection, and name-based classification, achieving over 85% accuracy on held-out evaluation sets.
- Designed data-sampling and human-evaluation procedures, applying statistical methods to assess dataset quality, annotation reliability, and model performance.
- Built an LLM-assisted chatbot evaluation pipeline, including evaluation criteria, prompt design, automated response scoring, and systematic analysis of model outputs.
- Developed language-data pipelines including web crawling, information extraction, LLM-assisted data generation, preprocessing, annotation, and quality control for text and speech datasets.
- Contributed to the development of linguistic resources, and rule-based components for speech and language tasks, including speech-to-text, text-to-speech, and part-of-speech parsing.

what3words (location-mapping technology company) **Jul 2023 – Aug 2023**
Remote Research Consultant *London, England*
Project: Vietnamese Automatic Speech Recognition system (in collaboration with VinFast)

- Conducted systematic linguistic error analysis of Vietnamese ASR outputs, categorising recurring errors involving phonetic confusions, lexical ambiguity, and contextual misrecognition.
- Translated error-analysis findings into data- and model-level recommendations.

ACADEMIC & PROFESSIONAL SERVICE

Supervising and Mentoring

- Advised a Master's thesis in Linguistics at Lancaster University, which is awarded a Distinction (2024).
- Mentored applicants in postgraduate and fellowship applications, with subsequent admissions to the Linguistics PhD programme at Lancaster University (2024), the YSEALI Fellowship (2024), the Stipendium Hungaricum Scholarship (2026).

Reviewing

- Reviewer for Cognitive Linguistic Studies (2026), Linguists' Day, Linguistic Society of Belgium (2025).

Organising

- Co-organised the PhD Day for the Department of Linguistics at KU Leuven. 2026.

PUBLICATIONS

Book chapters (peer-reviewed)

- Sofía Aguilar-Valdez*, **Bach Phan-Tat***, Dirk Speelman, Dirk Geeraerts, and Stefania Degaetano-Ortlieb. 2026. Discursive parallels of the chemical revolution: topic modelling and distributional analysis. In *Understanding Science with Large Language Models? Potentials for the History, Philosophy, and Sociology of Science* (open access, transcript). (Book chapter / edited volume). *Equal contribution.

Conference and workshop proceedings (peer-reviewed)

- **Bach Phan-Tat**, Kris Heylen, Dirk Geeraerts, Stefano De Pascale, and Dirk Speelman. 2026. ReFRAME or Remain: Unsupervised Lexical Semantic Change Detection with Frame Semantics. *Proceedings of the 15th Joint Conference on Lexical and Computational Semantics (*SEM 2026), ACL 2026*.

Invited talks & seminars

- **Bach Phan-Tat**. 2026. Underlying Dimensions of Semantic Change. NLP & text mining seminar organised by Leuven.AI.
- **Bach Phan-Tat**. 2026. SynFlow: Continuous Semantics Change Analysis via Dependency Co-occurrences. Data in Historical Linguistics seminar series.

EDUCATION

KU Leuven

PhD, Computational Linguistics

Sep 2024 – Present

Leuven, Belgium

Thesis: **Underlying Dimensions in Conceptual Change**

Selected Achievements

- Developed a lightweight and interpretable framework for lexical semantic change detection and analysis based on structured linguistic patterns and diachronic distribution comparison.
- Developed SynFlow, an efficient Python package for extracting syntactic co-occurrences and constructions, comparing their distributions across time, and incrementally clustering diachronic static embeddings.
- Built automated pipelines for LLM-assisted linguistic annotation; and for cleaning, lemmatising, and parsing large corpora.
- Optimised computational workflows through parallel and batch processing, reducing processing time by 80%.
- Maintained NephoSem, a lexical-semantics toolkit developed by the QLVL research unit, and adding support for other types of static embedding.

Thesis supervisors: Prof. Dr. Dirk Speelman, Prof. Dr. Dirk Geeraerts, Dr. Kris Heylen

WorldQuant University

MSc, Financial Engineering

Oct 2025 – Present

Remote

Finished modules: Financial Market, Financial Data, Financial Econometrics

University of Stirling

MSc, English Language and Linguistics

Sep 2021 – Sep 2022

Stirling, Scotland

Thesis: **The structure of *thời gian*: A semantic analysis of the Vietnamese lexeme *thời gian* based on Principled Polysemy**

Selected Achievements

- Crawled, cleaned, and compiled a specialised corpus of 500 randomly sampled Vietnamese news articles.
- Identified seven senses of the Vietnamese lexeme *thời gian* ('time'), their semantic structure and semantic development using the Principled Polysemy framework.

Thesis supervisor: Dr. Andrew Smith

Thesis grade: 80% (Distinction; class rank: 1st)

Average grade: 78% (Distinction; class rank: 1st)

Academy of Finance

BA, Corporate Finance

Aug 2016 – Aug 2020

Hanoi, Vietnam

Relevant modules: Linear Algebra, Calculus, Probability and Statistics, Econometrics

TECHNICAL SKILLS

Programming & Computing

- Programming languages (ordered by proficiency): Python (NumPy, Pandas, Matplotlib, scikit-learn, spaCy, PyTorch, Hugging Face), R, Bash, LaTeX
- Parallel, batch, and GPU-enabled computing workflows
- Databases: MongoDB, SQL
- Git/GitHub

Data Science

- Exploratory data analysis, data preprocessing and (interactive) data visualisation
- Machine learning and deep learning for NLP, time-series, structured data and computer vision
- Quantitative research design, experimental design, and A/B testing
- LLM-assisted annotation and evaluation workflows
- Mathematics: linear algebra, multivariate calculus, statistics

Linguistics & Corpus Methods

- Corpus tools: CQPweb, #LancsBox, Sketch Engine, AntConc
- Linguistic analysis: phonetics, morphology, syntax, semantics
- Linguistic annotation, transcription, and corpus preparation

AWARDS AND HONOURS

- **2026: First Place, Databricks Challenge** (US\$1,000), Hack-Nation's 4th Global AI Hackathon; 3,000+ participants from 300+ universities across 65+ countries.
- **2024: Marie Skłodowska-Curie Actions Doctoral Fellowship** (fully funded for three years), Horizon Europe; awarded to 10 out of 284 applicants worldwide.
- **2022: Research-Based Learning Prize for the best Master's dissertation in Literature and Languages** (GBP 225), University of Stirling; the first recipient in the history of the Linguistics department.
- **2021: Postgraduate Scholarship** (GBP 4,000), University of Stirling.

SELECTED ADDITIONAL TRAINING

Data Science

- Inferential Statistics (The University of Amsterdam)
- Applied Data Science Lab (WorldQuant University)
- Deep Learning (Neuromatch Academy)
- Applied AI Lab: Deep Learning for Computer Vision (WorldQuant University)

Linguistics

- Corpus Linguistics: Method, Analysis, Interpretation (Lancaster University)
- Corpus Linguistics Summer School (Birmingham University)

Financial Engineering

- Foundations of Financial Engineering (WorldQuant University)

Research Methodology

- Quantitative Method (The University of Amsterdam)
- Qualitative Research Methods (The University of Amsterdam)

LANGUAGES

- Vietnamese: Native
- English: IELTS 8.5 – C2
- Dutch: A2
